COMPATIBILITY

The Ghost S1 has a maximum graphic cards support of:

2.1-Slot: 144 (H) x 45 (W) x 305 (D) mm

If your GPU is close to these measurements there still might be problems with the PCIe power feed or that it just isn't specified properly, that is why we have comprised this table of GPUs that have been tested in reality so that you know what limitations might occur or what you might need to modify in order to fit your GPU. For obvious reasons we can not test all cards on the market but our ambition is to test as many as possible and to extend this list of compatible GPUs. We are hoping you can help us to develop this document.

* Will require a LP 90 degree adapter for the PCIe power feed and the removal of RGB strip or S-TopHat

** With PCIe Power feed in the back of the card a LP 90 degree adapter for the PCIe Power feed and the removal of RGP strip is required

*** S TopHat with LP 90 degree adapter for the PCIe Power feed or M TopHat
